

SPE Mid-Continent Section

Recruit New Members

The strength of SPE is its diverse, energetic, innovative, dedicated membership. One of the ways in which SPE grows is through members telling their colleagues and others about their own experiences with SPE and the benefits of SPE membership (www.spe.org/spe-app/spe/membership/benefits/index.htm). SPE recognizes members who put forth extra effort to recruit others, and holds annual contests for individuals and sections to add new members. Have you shared your SPE experience with others?

2008-2009 SPE Worldwide Section Membership Contest

The 2008-2009 Section Membership Contest has begun. The contest runs annually from September 1st thru August 31st. Sections compete in groups determined by total paid membership at the beginning of the contest. The Mid-Continent section is in "Group F" (401-1,000 members) and we are currently in 3rd place behind Austin and East Texas. Sections with the highest percentage total membership gain in each of the groups will receive a cash prize of \$1,000 dollars and a 2' x 5' SPE section banner. These winning sections also will be recognized in upcoming SPE publications and during ATCE 2009 in New Orleans, Louisiana USA.

2009 Mid-Continent SPE "One Member at a Time" Membership Contest

The Mid-Continent SPE membership committee will be announcing a local section membership contest sometime in January of 2009 in an effort to increase current member participation in recruiting new members. Cash prizes will be awarded, keep an eye out for the announcement in January via e-mail.
